Sky and TELESCOPE

INDEX to Volume XXIII

January to June, 1962

Titles

Aid to Study of the Heavens, An, *J. E. McDonald*, 134

Air Force Atlas of the Moon, *Joseph Ashbrook*, 204

Amateur Astronomy in Milwaukee, *Carolyn Kliman*, 206

Amateur Astronomy in San Francisco, *Joel W. Goodman*, 324

Amateur's H-R Diagram, An, *Michael J. Lambert*, 315

American Astronomers Report —
- American Astronomical Society group photograph, 254
- Are Clusters of Galaxies Stable? 317
- Colors on the Moon, 85
- Composition of Gaseous Nebulae, 254
- Element Identification in Peculiar Stars, 140
- Expansion of Planetary Nebulae, 316
- How Much Molecular Hydrogen in Interstellar Space? 141
- Jovian Radio Waves and Solar Radiation, 318
- Metals in Solar-type Stars, 141
- Meteor Observing by Radar, 316
- Meteoric Infall, 140
- Micrometeorite Collecting with a High-Altitude Rocket, 84
- Outlook for Infrared Astronomy, 140
- Polarization of M82's Light, 254
- VV Cephei, 254

America's Space Effort Accelerates, 142; correction, 209

Astronomers Gather for Eclipse in New Guinea, *Richard B. Dunn*, 124

Builder of Solar Observatories, *R. M. Petrie*, 187

Cassegrain-Type Telescopes, *Ronald R. Willey, Jr.*, 191

Collapse Phase of Early Solar Evolution, The, *A. G. W. Cameron*, 244; correction, 325

Comet Hunting for Amateurs, *Leslie C. Peltier*, 10

Comet Seki-Lines Picture Album, 304

Current List of Astronomical Stamps, A, *Alphonse P. Mayernik*, 138

Dilute Stellar Radiation, *Otto Struve*, 79

Dwarf Novae, The, *George S. Mumford, III*, I, 71; II, 135

Eclipse Observations of the Zodiacal Light, *Edward P. Ney*, 267

February's Eclipse Viewed by Amateurs, 194

February's Solar Eclipse and the West Coast, 3

First American Manned Satellite, 200

First Eclipse Reports, 123

Flare Stars, *Otto Struve*, September, 1959; correction to, 74

Geminid Meteors Widely Observed, 66

Giant Planisphere in Color, A, *Paul K. Hoover*, 203

Graphic Time Table of the Heavens—1962, 29

Hydrogen-Fueled Centaur Vehicle, The, 319

Interacting Galaxies, *Otto Struve*, 16; correction, 274

Japanese Photograph February Eclipse, 260

Kitt Peak's 80-inch Stellar Telescope, 5

Latest Pictures of Comet Seki-Lines by Alan McClure, 242a

Leonid Meteors Give Unexpected Display, 64

Life's Spread Through the Universe, 183

Light Helium in Stellar Atmospheres, *Otto Struve*, 198

M. A. Kovalsky and His Work on Stellar Motions, *Otto Struve*, 250

Meteorite Network, 303

Mulemba Observatory in Angola, The, *Antonio da Conceicao Rodrigues*, 22

New Planetarium Opens at Bridgeport, *Earle W. Newton* and *Phillip D. Stern*, 132

Next Year's Solar Eclipse, 87; correction, 131

Notes on Falling Bodies, *George A. Blair*, 310

Props for the Prof, *William A. Calder*, 75

Pulsating Star RR Lyrae, The, *Otto Struve*, 311

Society-Built Observatory in Texas, A, *Floyd L. Shirey*, 81

Some August Lunar Eclipse Results, *Raymond N. Watts, Jr.*, 23

Space Observations of Sun and Earth, 256

Spotlight on the Moon, 243

Story of Epsilon Aurigae, The, *Otto Struve*, 127

Telescope Making at the Adler Planetarium, *Louise Ryan*, 248

Three Bright Fireballs in Spring Skies, 323

Total Solar Eclipse over New Guinea, *M. Waldmeier*, 184

Williams College Renovates Hopkins Observatory, *Theodore G. Mehlin*, 67

Wondering (poem), *Clara Marie Niebuhr*, 249

Authors

Ashbrook, Joseph, Air Force Atlas of the Moon, 204
- Astronomical Scrapbook, 76, 210, 322
- book review, 44

Beck, Hans G., letter, 63

Bieda, Stephen W., Jr., solar eclipse report, 196

Blair, George A., Notes on Falling Bodies, 310

Blondin, D. G., Flint, Michigan, 83

Both, Ernst E., book review, 341

Brant, Irving, letter, 63

Bryan, Edwin H., Jr., solar eclipse report, 195

C. A. F., see *Federer, Charles A., Jr.*

Calder, William A., Props for the Prof, 75

Cameron, A. G. W., Collapse Phase of Early Solar Evolution, The, 244; correction, 325

Chilton, Lewis J., solar eclipse report, 197

Cox, Robert E., conductor, Gleanings for ATM's, 48, 109, 168, 226, 288, 347

Further Notes on Multiple Extrafocal Images, 168
Photometers for Observing Faint Night-Sky Phenomena, 288
Two Reflectors with Simple Mountings of Pipe, 347
Windows for Reflectors, 171

Cruikshank, Dale P., letter, 126

da Conceicao Rodrigues, Antonio, Mulemba Observatory in Angola, The, 22

Dall, Horace E., Dall-Maksutov Telescope with an Erecting Lens, A, 109; correction, 274
Why Not an Erecting System? 48

Dombrowski, Philip L., Naked-Eye Sunspots, 211

Donn, Bertram, book review, 282

Dunn, Richard B., Astronomers Gather for Eclipse in New Guinea, 124

Federer, Charles A., Jr., Rambling Through . . . (current month) Skies, 176, 236, 296, 356

Fichtl, Darrell R., Two-Pier Equatorial Mounting, A, 112

Glenn, William H., Meteors, 54, 235, 295
Sun, Moon, and Planets This Month, The, 55 (correction, 69), 115 (correction, 215), 175, 235, 295, 355

Goo, Harry, Jr., solar eclipse report, 195

Goodman, Joel W., Amateur Astronomy in San Francisco, 324

Griffith, Tony, Junior's Home-Built Observatory, A, 326

Harlan, Eugene A., Amateur Photography with Modest Equipment, 148

Hawkins, Gerald S., book review, 100

Herring, Alika K., Observing the Moon, Hortensius, 33; Plateau near Linné, 212

Hoffleit, Dorrit, book review, 165

Hogg, A. R., solar eclipse report, 194

Hoover, Paul K., Giant Planisphere in Color, A, 203

Houston, Walter Scott, Deep-Sky Wonders, 38, 96, 156, 213, 277, 335

Huang, Su-Shu, book review, 341

J. A., see *Ashbrook, Joseph*

Kliman, Carolyn, Amateur Astronomy in Milwaukee, 206

Lambert, Michael J., Amateur's H-R Diagram, An, 315

Laskey, Howard G., book review, 101

Lauricella, Dominic, Colorado Observatory, A, 208

Leavitt, Robert K., M17 Elbow Telescope as a Finder, The, 350

Lee, Raymond, solar eclipse report, 196

Linnell, Albert P., book review, 102; correction, 215

Marshall, Roy K., book review, 162

Mathews, Robert T., book review, 221

Mayernik, Alphonse P., Current List of Astronomical Stamps, A, 138

McDonald, J. E., Aid to Study of the Heavens, An, 134

Mehlin, Theodore G., Williams College Renovates Hopkins Observatory, 67

Melin, Marshall, Observing the Satellites, 13; correction to November, 1961, 69

Merletti, Ralph J., solar eclipse report, 196

Merriam, Carroll F., letter, 126

Mumford, George S., III, Dwarf Novae, The, I, 71; II, 135

Newton, Earle W., and *Stern, Phillip D.*, New Planetarium Opens at Bridgeport, 132

Ney, Edward P., Eclipse Observations of the Zodiacal Light, 267

Niebuhr, Clara Marie, Wondering (poem), 249

Nininger, H. H., letter, 252

Norton, O. Richard, book review, 161
solar eclipse report, 196

Oates, Richard, Star Study in Arabic, 327

Opik, Ernst J., book review, 160

Page, Thornton, book review, 100

Pagel, B. E. J., book review, 279

Parmenter, B. C., Amateur Solar Observations, 95

Patston, Gordon E., solar eclipse report, 194

Peltier, Leslie C., Comet Hunting for Amateurs, 10

Petersen, Norman D., January's Quadrantid Meteor Shower Observed, 215

Petrie, R. M., Builder of Solar Observatories, 187

R. E. C., see *Cox, Robert E.*

Raddatz, Harold G., Photographing the Moon and Planets, 152

Randi, James, Indicator Light for Electric Drives, An, 172

Rizzo, Patrick V., book review, 342

Roberts, Valerie A., film review, 343

Robidart, Gabe, solar eclipse report, 196

Robinson, Eric, British Telescope Made from Scrap, A, 327

Rohr, Hans, Huge Turnout for Swiss Telescope Makers' Meeting, 82

Rost, Carlos E., Archimedes, 336

Russell, Mrs. Dora, letter, 253

Ryan, Louise, Chicago Planetarium Society, 28
Telescope Making at the Adler Planetarium, 248

Sharpless, Albert P., Florida Observing Station, A, 28

Shawcross, William E., Questions from the S+T Mailbag, 259, 318

Shirey, Floyd L., Society-Built Observatory in Texas, A, 81

Stern, Phillip D., see *Newton, Earle W.*

Struve, Otto, Dilute Stellar Radiation, 79
Flare Stars, September, 1959; correction to, 74
Interacting Galaxies, 16; correction, 274
Light Helium in Stellar Atmospheres, 198
M. A. Kovalsky and His Work on Stellar Motions, 250
Pulsating Star RR Lyrae, The, 311
Story of Epsilon Aurigae, The, 127

Sweetsir, Richard, letter, 253

Tatsch, J. H., letter, 63

Thomas, David F., solar eclipse report, 197

W. E. S., see *Shawcross, William E.*

Waldmeier, M., Total Solar Eclipse over New Guinea, 184

Warner, Brian, Rilles near Moore, 339

Warreyn, G. J., letter, 253

Watts, Raymond N., Jr., Some August Lunar Eclipse Results, 23

Wegner, Gary, Amateur's Portrait of Mercury, An, 333

Werner, Helmut, letter, 252

Whitaker, E. A., book review, 40

Willey, Ronald R., Jr., Cassegrain-Type Telescopes, 191
Characteristics and Testing of Cassegrain-Type Telescopes, 226; correction, 351

Wyatt, Stanley P., book review, 218

Departments and Features

Amateur Astronomers —

AAVSO Spring Meeting, 209
Albuquerque Moonwatch, 146
Amateur Briefs, 28, 83, 146, 208, 265, 326
Astronomical League Booklets, 83
British Telescope Made from Scrap, A, 327
Chicago Planetarium Society, 28
Colorado Observatory, A, 208
Cox, Robert, Astronomical League Award to, 327
Flint, Michigan, 83
Florida Observing Station, A, 28
Huge Turnout for Swiss Telescope Makers' Meeting, 82
Junior's Home-Built Observatory, A, 326
Middle East Convention, 82
New England Meeting, 265
New York, New York, 209
North Central Convention, 145
Planetarium Listing, 326
Reseda, California, 146
Royal Astronomical Society of Canada Assembly, 265
Southeast Convention, 265
Special Tours Planned for Western Amateurs, 145
Star Study in Arabic, 327
Summer Institute for High School Students, 265
This Month's Programs and Conventions, 28, 82, 145, 209, 265, 327
Three Astronomical League Conventions Planned, 208
Three Field Trips Planned, 327
Two Sliding-Roof Observatories in California, 145

Astronomical Scrapbook —

Lost Legacy of Dr. Peate, The, 210
Lunar Studies Before the Invention of the Telescope, 322
Shadows on the Blocksberg, 76

Books and the Sky —

Astronomy with an Opera-Glass, Garrett P. Serviss, 161
Atlas of the Moon's Far Side, An, N. P. Barabashov, A. A. Mikhailov, and Yu. N. Lipsky, editors; Richard B. Rodman, translator, 40
Atlas of the Other Side of the Moon, N. P. Barabashov, A. A. Mikhailov, and Yu. N. Lipsky, editors; Leon Ter-Oganian, translator, 40
Atlas of the Universe, Br. Ernst and Tj. E. de Vries, 341
Basic Physics of the Solar System, V. M. Blanco and S. W. McCuskey, 102; correction, 215
Earth, the Planets, and the Stars, The, K. E. Edgeworth, 341
History of the Rittenhouse Astronomical Society 1888-1960, Cecil M. Billings, 44
Hubble Atlas of Galaxies, The, Allan Sandage, 218
Introduction to Celestial Mechanics, An, Theodore E. Sterne, 100
Man and the Moon, Robert S. Richardson, commentator, 162
Medical and Biological Aspects of the Energies of Space, Paul A. Campbell, editor, 101
Meteor Science and Engineering, D. W. R. McKinley, 160
Our Emerging Universe, Allan Broms, 342
Physics of the Solar Chromosphere, Richard N. Thomas and R. Grant Athay, 279
Principles of Meteoritics, E. L. Krinov, 282
Satellite Environment Handbook, Francis S. Johnson, editor, 100
Space Nomads, Lincoln LaPaz and Jean LaPaz, 165
Splendor in the Sky, Gerald S. Hawkins, 221

Celestial Calendar —

Jupiter's Satellites, 295, 355
Meteors, 54, 235, 295
Minima of Algol, 54, 114, 175, 234, 294, 354
Minor Planet Predictions, 55, 114, 175, 234, 354
Moon Phases and Distances, 54, 114, 175, 235, 294, 354
New Algol Observations, 114; correction, 174
Occultation of Saturn June 20-21, 354
Occultations of Planets and Bright Stars, 54; Bright-Star Occultations, 115; March Occultations, 175
Overlapping Occultations of Regulus and Uranus, 54
Sun, Moon, and Planets This Month, The, 55 (correction, 69), 115 (correction, 215), 175, 235, 295, 355
Variable Star Maxima, 55, 114, 174, 234, 294, 354
Variable stars: W Geminorum, 54; R Serpentis, 114; S Cancri, 174; Bamberg Variable 372 in Corvus, 234; V Canum Venaticorum, 294; RR Lyrae, 354

Feature pictures —

Lunar chart, Copernicus region, 205
Orion nebula, 150
Southern galaxy: NGC 1365, November, 1958; correction, 131

Films and the Sky —

Story of the Universe, The, Harlan J. Smith, Unit III: The Stars, 343

Front-cover photographs —

Chicago telescope fair, 241
Comet Seki-Lines, 301
Construction at Kitt Peak, 1
Hopkins Observatory, 61
Kitt Peak solar telescope, 181
Star trails over Texas, 121

Getting Acquainted with Astronomy —

Our Nearest Star, The Sun, I, 146; II, 262
Planets, The, Uranus, Neptune, and Pluto, 26

Gleanings for ATM's —

Anodizing Aluminum, 229
Characteristics and Testing of Cassegrain-Type Telescopes, 226; correction, 351
Dall-Maksutov Telescope with an Erecting Lens, A, 109; correction, 274
Further Notes on Multiple Extrafocal Images, 168
Indicator Light for Electric Drives, An, 172
M17 Elbow Telescope as a Finder, The, 350
Photometers for Observing Faint Night-Sky Phenomena, 288
Two-Pier Equatorial Mounting, A, 112
Two Reflectors with Simple Mountings of Pipe, 347
Why Not an Erecting System? 48
Windows for Reflectors, 171

In the Current Journals, 21, 70, 130, 186, 266, 314

Letters, 63, 126, 252

New Books Received, 45, 106, 166, 223, 284, 344

News Notes —

American Astronomical Society Meeting, 199
Are Comets Radio Sources? 131
Astronomical Society of the Pacific Meeting, 197
Binary Nova Sagittae, The, 314
Bruderheim Meteorite, The, 20
Communications Satellites, 186
Conjunction of Regulus and Uranus, 204
Diamonds in Meteorites, 130
Douglass, A. E., Dies, 271
Draco Dwarf Galaxy, The, 21
Dutch Astronomer Dies, 70
Earth's Radiation Belt, 323
Eclipse Expeditions on New Guinea, 69
Electron Accelerator, 321
Exosphere Mapped, 325
Fate of the First West Ford Package, 266
Geocoma and Geotail, 20
Gravitational Red Shift, 130
History of the Cateye, 325
How Rough Is the Moon's Surface? 266
Hungarian Astronomer Dies, 69
Leonid Dust Particles, 130
Lunar Rays, 69
McMath, Robert R., 91
New Director at Michigan, 266
New Optical Journal, 70
New Variable Star, 186
Nova Aurigae—An Eclipsing Binary, 131
Physiological Hazards of Space Travel, 139
Price, Robert L., 249
Project Oscar, 186
Radar Observations of the Sun, 70
Radar Studies of the Planets, 186
Radio Astronomy Antennas, 131
Radio Astronomy Course, 186
Recht, Albert W., Death of, 129
Relocating a 36-inch Telescope, 271
Smallest Known Star, 314
Some Newly Named Asteroids, 259
Space Exhibit at Seattle World's Fair, 185
Struve, Otto, Resigns at Green Bank, 70
Sun's Radio Corona, The, 314
Swann, William F. G., 139
350 Years of Sunspots, 131
Two Periodic Comets, 131
Unusual Optical Elements, 69
Urey, Harold C., Honored, 325
Velocity of Light, 21
Venus Photographs, 310
Whipple, F. L., Award to, 141
Work on 140-foot Radio Telescope Delayed, 266

Observer's Page —

Aid to Observing, An, 39
Amateur Photography with Modest Equipment, 148
Amateur Solar Observations, 95
Amateur's Portrait of Mercury, An, 333
Archimedes, 336
Beautiful Dawn Sight, A, 37
Comet Humason 1961e, 337
Comet 1962b, 273
Comet Seki-Lines, 211; Comet Seki-Lines Well Observed in April Evening Sky, 272
Conjunction of Mercury and Jupiter, 155
Deep-Sky Wonders, 38, 96, 156, 213, 277, 335
January's Quadrantid Meteor Shower Observed, 215
Lyrid Meteors Observed, 336
March Occultation Reports, 276

Observer's Page (continued) —

Moon and Four Planets in Early March, The, 339
Naked-Eye Sunspots, 211, 274
New Photographic Division of the AAVSO, 276
Observing the Moon, Hortensius, 33; Plateau near Linné, 212
Penumbral Lunar Eclipse, 212
Photographing the Moon and Planets, 152
Pictures of Jupiter, 273
Planetary in Andromeda, 153
Reports on Comet Seki, 34
Rilles near Moore, 339
Seeing Scale, A, 153
Sunspot Numbers, 39, 93, 156, 216, 274 (correction, 334), 335
Three Occultations Observed, 216
Viewing the Zodiacal Light and Gegenschein, 92
Visibility of Planetary Nebulae, 336

Observing the Satellites —

Announcement, department discontinued, 85
Discoverers 34 and 35, 14
Mercury-Atlas 5, 13
New Ground-Support Facilities, November, 1961; correction to, 69
Ranger 2 Misfires, 14
Transit IV-B and Traac, 14
West Ford Orbit, The, 13

Questions from the S + T Mailbag, 21, 77, 141, 209, 259, 318

Rambling Through . . . (current month) **Skies,** 176, 236, 296, 356

Southern Stars, 116, 238, 358

Stars for . . . (current month), 57, 117, 177, 237, 297, 357

Selected Topics and Celestial Objects

This listing is not intended to be exhaustive, and does not supplant the other parts of the index. For example, material from such regular features as Amateur Astronomers ordinarily appears only under the Departments and Features section.

Amateur astronomers: International Astronomical Association of Photoelectric Observers, 265; meetings — Switzerland, 82; societies — Austin, Tex., 83; Chicago, Ill., 248; Dallas, Tex., 81; Gettysburg, Pa., 208; Kent, Ohio, 83; Milwaukee, Wis., 206; San Francisco, Calif., 324

Artificial satellites: Apollo project, 202; Centaur, 319; communications-type, 186; Cosmos I and II, 259; Cosmos III and IV, 321; Discoverers 34 and 35, 14; Discoverer 36, 186; Echo I, 253; Glenn flight, 200; Mercury-Atlas 5, 13; Minitrack station, 253; orbiting solar observatory, 256; physiological hazards, 139; Ranger 2, 14; Ranger 3, 143 (correction, 209); Ranger 4, 321; Tiros IV, 257; Transit IV-B and Traac, 14; U. S. program, 142; West Ford, 13, 266

Asteroids: 259

Binaries: Epsilon Aurigae, 127; Nova Aurigae, 131; VV Cephei, 254; WZ Sagittae, 314

Clusters: Double, 39; globular — M5, 335; M13, 149

Comets: hunting, 10; radio sources, 131; Harrington-Abell, 131; Humason, 337; Seki, 34; Seki-Lines, 211, 242a, 272, 304; Tuttle-Giacobini-Kresak, 131, 273

Conjunctions: Mercury and Jupiter, 155; Moon, Venus, and Mercury, 37; Uranus and Regulus, 204

Constellations: Bootes, 176; Cassiopeia, 78; Centaurus, 356; Corvus, 176; Crux, 356; Draco, 356; Leo, 176; Lupus, 356; Ursa Major, 176, 236; Virgo, 176

Earth: atmosphere, 20; exosphere, 325; radiation belt, 323

Eclipses: August 25, 1961, lunar, 23; February 4-5 solar, 3, 69, 123, 124, 184, 194, 260, 267; February 19th penumbral lunar, 212; July 20, 1963, solar, 87 (correction, 131), 126

Education: observing and laboratory apparatus, 75, 134; planisphere, 203; radio astronomy, 186; society literature, 83; space exhibit, 185

Galaxies: clusters of, 317; dwarf, 21; interacting, 16; M31, 38, 149; M33, 38, 149; M51, 16; M82 polarization, 254; NGC 520, 219; NGC 1300, 97, 218; NGC 1400, 97; NGC 1407, 97; NGC 2403, 156; NGC 2685, 219; NGC 3115, 219; NGC 3414, 156; NGC 3486, 156; NGC 3504, 156; NGC 3637, 213; NGC 3672, 213; NGC 3732, 213; NGC 3865, 213; NGC 3887, 213; NGC 5713, 335; NGC 5746, 335; NGC 5846, 335

Gegenschein: 92

History: Budapest Observatory, 76; gravitation, 310; Hopkins Observatory, 67; M. A. Kovalsky, 250; lunar studies, 322; John Peate, 210

Interstellar medium: molecular hydrogen in, 141

Jupiter: 152; radio spectrum, 318

Life: extraterrestrial, 183

Mercury: 296; map, 333

Messier objects: M5, 335; M13, 149; M31, 38, 149; M33, 38, 149; M51, 16; M82, 254

Meteorites: Bruderheim, 20; characteristics, 130; infall, 140; recovery network, 303

Meteors: fireballs — March 18th, 265; March 31st, 323; April 18th, 323; April 23rd, 323; Geminids, 66; Leonids, 64, 130; Lyrids, 336; Quadrantids, 215; radar observations, 316; Taurid fireball, 63; terminology, 252

Micrometeorites: collecting, 84

Moon: Air Force atlas, 204; Archimedes, 336; color, 85; Copernicus, 205; early studies, 322; far side, 41; Hortensius, 33; man-made light, 243; plateau near Linné, 212; Posidonius, 152; rays, 69; rilles near Moore, 339; surface, 266; Theophilus, 152; see also Eclipses

Nebulae: composition, 254; Orion, 148, 150; planetary — NGC 246, 316; NGC 1535, 96; NGC 2392, 316; NGC 6781, 336; NGC 7662, 153, 336; Ring in Lyra, 316

Neptune: 26

Observatories: amateur, 22, 28, 81, 145, 208, 326; Green Bank, 266; Hopkins, 67; Kitt Peak, 5, 190; McMath-Hulbert, 187; Steward, 271

Observing: amateur H-R diagram, 315; seeing scale, 153

Occultations: Aldebaran, 54, 115, 175, 216; Mercury, 54, 175, 216; Regulus, 54, 115, 216; Saturn, 54, 175, 354; Uranus, 54; Vesta, 54

Optics: Cassegrain-type, 191, 226 (correction, 351); extrafocal images, 168; quartz lenses, 69

Personal notes: R. Cox, 327; A. Douglass, 271; K. Lassovsky, 69; R. McMath, 91, 187; O. Mohler, 266; R. Price, 249; J. Raimond, Jr., 70; A. Recht, 129; O. Struve, 70; W. Swann, 139; H. Urey, 325; F. Whipple, 141

Photography: amateur, 148, 152, 273; Cat-eye, 325

Photometer: 288

Physics: electron accelerator, 321; light velocity, 21

Planetariums: Bridgeport, Conn., 132

Pluto: 26

Radar studies of planets, 186

Radiation: dilution of, 78

Radio telescopes, 131

Saturn: 152

Stamps: astronomical, 138

Stars: Arcturus, 176; light helium in, 198; peculiar, 140; solar-type, 141; spectra, 140; Spica, 176; Thuban, 356; trails, 126; white dwarf, 314

Sun: 146; amateur observing, 95; evolution, 244; radar observations, 70; radio corona, 314; red shift, 130; spots, 131, 211, 262, 274; see also Eclipses

Telescope accessories: indicator light, 172; M17 elbow telescope, 350

Telescopes: anodizing parts, 229; closed-end reflectors, 171; Dall-Kirkham, 48; Dall-Maksutov, 109; 80-inch Kitt Peak, 5; equatorial mounting, 112; pipe mountings, 347

Uranus: 26

Variable stars: Algol, 114 (correction, 174); BV 372, 234; HD 220,870, 186; RX Andromedae, 72; AE Aquarii, 74, 136; Epsilon Aurigae, 127; Nova Aurigae, 131; Z Camelopardalis, 72, 136; S Cancri, 174; V Canum Venaticorum, 294; VV Cephei, 254; EY Cygni, 136; SS Cygni, 73, 135; U Geminorum, 71, 135; W Geminorum, 54; VW Hydri, 73; RR Lyrae, 311, 354; WZ Sagittae, 314; R Serpentis, 114; W Ursae Majoris, 137

Venus: 296; photography, 310

Zodiacal light: 92, 126, 267

Sky and TELESCOPE

INDEX to Volume XXIV

July to December, 1962

Titles

ALPO 15th Anniversary, 3

Amateur Astronomy in Pittsburgh, *Leo J. Scanlon* and *Frank Delaney*, 82

Amateur Looks Forward to Next July's Eclipse, An, *George W. Walker*, 331

American Astronomers Report —
Evolution of Protostars, 267
Frequency of Binary Stars, 266
Intergalactic Hydrogen? 267
Mercury's Atmosphere, 266

Astronomical League Convenes at Albuquerque, *Alan McClure*, 264; correction, 343

Astronomical Unit, The, *Joseph Ashbrook*, 63

Astronomy at Seattle's World's Fair, *James Kousbaugh*, 208

Australian 210-Foot Radio Telescope, The, *H. C. Minnett*, 184

Birth of McDonald Observatory, The, *Otto Struve*, 316

Canada's First Public Planetarium, *Ian C. McLennan*, 86

Careers in Astronomy, *Kenneth L. Franklin*, 126

Comet Humason Displays Unusual Activity, 124

Comet Humason Still Active, 336

Coronagraph Above the Atmosphere, A, *Gordon Newkirk, Jr.*, and *John A. Eddy*, 77

Early Solar Evolution, *D. Ezer* and *A. G. W. Cameron*, 328

Filamentary Nebula S147, The, *Otto Struve*, 190

Florida's Central Museum Planetarium, *Thomas E. Gordon, Jr.*, 326

Galileo's First Records of Jupiter's Satellites, *Jean Meeus*, 137

Helicopter Dome Lift at Berkeley, 130

Illinois' Vermilion River Observatory, *G. C. McVittie*, 322

International Space Research, 26

Lunar and Planetary Meeting at Montreal, 194

Mariners To Study Venus, 146

Milestones in Double Star Astronomy, *Otto Struve*, 17

Moon Occults Saturn, The, 268

Moonwatch and Sputnik 4, 183

New Jersey Fireball of April 23, 1962, The, *Charles P. Olivier*, 19

New Planetarium Proposed for Washington, D. C., 20

Notes on Falling Bodies, *George A. Blair*, June, 1962; correction to, 136

Observing Jupiter, *Elmer J. Reese*, 70

Observing Occultations, 282

Occultation Supplement — 1963 Predictions for the United States and Canada, 275

Oldest Star Clusters, The, *Otto Struve*, 261

Orbiting Astronomical Observatory, The, 339

Planetary Colloquium at Liège, *M. Minnaert*, 248; correction, 343

Planning Manned Flight to the Moon, 204

Precise Photographic Measurement of Star Positions, *W. Dieckvoss*, 198

Radio Observatory at Hat Creek, California, 64

Reminiscences of Pulkovo Observatory, *Alexander N. Vyssotsky*, 12

Schirra's Flight, 247

Simple Radio Telescope, A, *Dennis N. Downes*, 75

Site Testing in New Zealand, *Frank M. Bateson*, 4

Solar Particles in Interplanetary Space, *Constance S. Warwick*, 133

Solar Physics News, *Otto Struve*, 141

Telescope Making at a Boys' Club, *Robert G. Hoffmann*, 10

Telstar, the Communications Satellite, 89

210-Foot Radio Telescope's First Results, *Frank J. Kerr*, 254

Variable Stars of Low Intrinsic Luminosity, *Otto Struve*, 67

Western Amateurs in Hawaii, *Thomas A. Cragg*, 252; correction, 343

Authors

Arthur, D. W. G., book review, 290

Ashbrook, Joseph, Astronomical Scrapbook, 66, 193, 321
Astronomical Unit, The, 63
Finding a Variable Star's Date of Maximum, 219
Great Red Spot Timetable, 93

Bateson, Frank M., Site Testing in New Zealand, 4

Blair, George A., Notes on Falling Bodies, June, 1962; correction to, 136

Boyer, Carl B., book review, 102

Brandt, Rudolf, letter, 207

Buday, Bernard R., O.S.B., St. Procopius College Observatory, The, 342

Bulluck, James P., III, Great Lakes Convention, 210

Wright, G. R., Middle East Convention, 84
Young, Andrew, book review, 99

Departments and Features

Amateur Astronomers —

AAVSO October Meeting Report, 343
AAVSO Spring Meeting, 24
Albuquerque Astronomers To Be Astronomical League's Host, 25
ALPO Convention, 149
Amateur Briefs, 24, 85, 149, 271, 342
Blair Award for 1962, 24
Canadian Amateurs Hold Annual Convention, 84
Great Lakes Convention, 210
Junior Activities in Pomona, California, 271
Junior Telescope Project, 271
Middle East Convention, 84
Mid-States Convention, 85
Northeast Region, 24
Observatory in St. Thomas, 210
St. Procopius College Observatory, The, 342
San Diego Amateurs, 209; correction, 271
Society Listing, 25, 85
Solar Observatory in Yugoslavia, A, 210
Stellafane Program, 24
Telescope Makers Hold Convention at Stellafane, 148
This Month's Programs and Conventions, 84, 148, 210, 271, 343
Western Star Parties, 25

Astronomical Scrapbook —

A. G. Pingré and his Annals, 321
Sage of Mare Island, The, 193
Where and When — Without Instruments, 66

Books and the Sky —

Advances in Space Science and Technology: Volume 3, Frederick I. Ordway, III, editor, 100
Astronomical Photography, Gerard de Vaucouleurs, 39
Astronomical Spectroscopy, A. D. Thackeray, 363
Captives of the Sun, James S. Pickering, 160
Elements of Mathematical Astronomy, Martin Davidson, 295
Fabric of the Heavens, The, Stephen Toulmin and June Goodfield, 102
History of Astronomy, A. A. Pannekoek, 360
Introduction to Astronomy, Dean B. McLaughlin, 225

Introduction to Space Dynamics, William Tyrrell Thomson, 159
Moon: A Russian View, The, A. V. Markov, editor, 360
Moon Atlas, V. A. Firsoff, 41
Physics and Astronomy of the Moon, Zdenek Kopal, editor, 290
Planet Saturn, The, A. F. O'D. Alexander, 292
Planets and Satellites, Gerard P. Kuiper and Barbara M. Middlehurst, editors, 99
Radio Astronomy, J. H. Piddington, 39
Stars: A New Way To See Them, The, H. A. Rey, 226
Stars, Men and Atoms, Heinz Haber, 226
Universe of Space, This, Peter M. Millman, 45
Vistas in Astronomy, Volumes 4 and 5, Arthur Beer, editor, 159

Celestial Calendar —

Eclipses in July, 56
Jupiter's Satellites, 55, 115, 175, 239, 307, 375
Leonids, The, 306
Meteors, 56, 115, 238, 307, 374
Minima of Algol, 56, 116, 175, 238, 306, 374
Minor Planet Predictions, 56, 114, 176, 238, 306, 374
Moon Phases and Distances, 54, 116, 176, 238, 306, 374
Mu Cephei, 114
Northern Variable — R Camelopardalis, A, 374
Occultation of Saturn on September 10-11, 174
R Arietis, 238
R Draconis, 54
S Cephei, 174
Saturn To Occult a Star, 54
Sun, Moon, and Planets This Month, The, 55, 115, 175, 238, 307, 375
Variable Star Maxima, 54, 114, 176, 239, 306, 374
Venus-Spica Conjunction August 30-31, 114; correction, 123
Well-Known Long-Period Variable — W Andromedae, A, 306

Feature pictures —

Filamentary nebula S147 in Auriga, The, 190

Films and the Sky —

Earth and Sky, June Goodfield and Stephen Toulmin, 161
Measuring Large Distances, Fletcher Watson, 161

Front-cover photographs —

Astronauts at Morehead Planetarium, 245
85-foot radio telescope at Hat Creek, California, 61
First look at the heavens, 1
Giant Australian radio telescope, 181
Installing a dome by helicopter, 121
St. Procopius College Observatory, 313

Getting Acquainted with Astronomy —

Our Nearest Star — The Sun, III, 22; IV, 139

Gleanings for ATM's —

Large Reflector on a Cross-Axis Mounting, A, 48
Making Low-Power Eyepieces for Amateur Use, 300
Orthoscopic Eyepiece from Stock Parts, An, 303
Placing and Aligning the Newtonian Diagonal, 368
Portable Telescope for Astrophotography, A, 170
"Practical Heated Observatory, A," 370
Precision Caustic-Curve Tester, A, 106
Rich-Field Telescope with a Transfer Lens, A, 168
Rugged, Inexpensive Telescope Mounting, A, 109
10-inch Spherical Reflector with a Negative Correcting Lens, A, 231
Using Wide-Band Interference Filters for Solar Observing, 51

Here and There with Amateurs, 211

In the Current Journals, 16, 74, 132, 196, 251, 335

Letters, 9, 88, 123, 207, 315

New Books Received, 46, 103, 162, 228, 296, 364

News Notes —

AAS Headquarters, 16
Age of the Galaxy, 16
American Astronomical Society Meeting, 74, 335
Ammonia and Jovian Rotation, 196
Antarctic Micrometeorites, 335
Argentine Meteorites, 132
Astronomy Career Booklet, 197
Astrophysics Laboratory, 251
Aurora on Jupiter? 16
Balloon Astronomy, 74
Balloon Launch Station, 16
Celestial Mechanics Research Center, 11
Coblentz, W. W., 260
Coming Transit of the Earth, 338
Coronagraph Improvement, A, 197; correction, 315
Flexure in Large Fork Mountings, 335
Geologic Lunar Maps Available, 196
Giacobinid Meteor Shower Origin, 325
Giant Radio Array, 83
Glenn's Space Report, 83
Graduate Education Conference, 251
Griffith Planetarium Orders New Projector, 74
International Year of the Quiet Sun, 15
July Annular Eclipse, 251
Jupiter Radio Ephemeris, 132
Large Magellanic Cloud Super-Supergiants, 16
McMath Solar Telescope, 11
Meteorite Expert Dies, 16
Mount Wilson Astronomer, 74
New Zealand Planetarium, 132
Peculiar Variable, 132
Progress at Green Bank, 21
Punched-Card Catalogue, 196
Rainfall and the Moon, 251
Reber, Grote, Honored, 132
Schilt, Jan, Retires, 74
Solar Telescope Dedicated, 335
Space Science Journal, 196
Spotlighted Moon, 15
Sugar Grove Radio Telescope Abandoned, 132
UCLA Expands Astronomy Program, 81
University of Maryland Astronomy Program, 15
Upper Atmosphere Density, 335
Veteran Dutch Astronomer, 335
X-rays from the Milky Way? 196

Observer's Page —

Amateur Photoelectric Photometry, 221
Comet Humason Observations, 216
Daylight Fireball, 36
Deep-Sky Wonders, 37, 95, 156, 221, 286, 354
Eta Aquarid Meteors Observed, 36
Finding a Variable Star's Date of Maximum, 219
Great Red Spot Timetable, 93, 218
July Occultation of Venus Seen from Australia, 154
Lunar and Planetary Exposure Times, 30
Mercury, Venus, the Moon, and Aldebaran, 35
Moon, Regulus, and Venus, 219
More Perseid Observations, 284
NGC Numbers for Norton's *Star Atlas*, 273
North America Nebula, 31
Notes on Observing Meteors and Fireballs, 285
Notes on Three Comets, 96
Observations of Saturn's Occultation in June, 92
Observing the Moon, Flamsteed, 36; Wallace, 218
Perseid Meteor Shower — 1962, The, 220
Photography with a Portable Telescope, 150
R Coronae Borealis Fading, 94
Recent Disturbances on Saturn, 215
Recent Observations of Jupiter, 351
Saturn Occults a Star, 154
Search Ephemeris for the L_4 Cloud Satellite, 356
Seeing the North America Nebula, 353
Some Striking Objects for Telescope Viewing, 352
Sunspot Numbers, 32, 94, 155, 219, 272, 356
Supernovae and Amateur Observations, 357
Venus-Spica Conjunction Observed, 272
White-Light Solar Flare, 31

Planetarium Notes, 164

Questions from the S + T Mailbag, 11, 81, 145, 189, 267, 343

Rambling Through . . . (current month) Skies, 56, 116, 176, 240, 308, 376

Southern Stars, 58, 178, 310

Stars for . . . (current month), 57, 117, 177, 241, 309, 377

Selected Topics and Celestial Objects

This listing is not intended to be exhaustive, and does not supplant the other parts of the index. For example, material from such regular features as Amateur Astronomers ordinarily appears only under the Departments and Features section.

Amateur astronomers: ALPO 15th anniversary, 3; meetings — AAVSO, 24, 343; ALPO, 149, 194; Astronomical League, 24, 25, 84, 85, 210, 264 (correction, 343); RASC, 84; Stellafane, 24, 148; Western Amateur Astronomers, 252 (correction, 343); societies — Pittsburgh, Pa., 82; Pomona, Calif., 271; San Diego, Calif., 209 (correction, 271)

Artificial satellites: Alouette, 260; Anna, 341; Apollo project, 204; Ariel, 26; Carpenter flight, 28; Cosmos V, 27; Explorer XIV, 260; Glenn report, 83; Mariner program, 146, 207; Mars probe, 341; Moonwatch, 183; OAO, 339; OSO, 28; Oscar, 90; radiation satellites, 260; Ranger 5, 340; Saturn tests, 27; Schirra flight, 247; Soviet failures, 206; Sputnik 4, 183; Telstar, 89; Vostoks 3 and 4, 207

Balloon astronomy: 16, 74; flying coronagraph, 77

Celestial mechanics: research center, 11

Clusters: globular — M9, 37; M13, 37; M14, 37; M15, 156; M30, 156; NGC 6342, 37; NGC 6356, 37; NGC 6366, 37; NGC 6934, 156; oldest — 261; open — M11, 95; NGC 188, 261; NGC 7772, 221

Comets: Honda (1962d), 96; Humason (1961e), 96, 124, 216, 336; Seki-Lines (1962c), 96

Conjunctions: Moon, Aldebaran, and Venus, 35; Moon, Regulus, and Venus, 219; Venus and Spica, 114 (correction, 123), 272

Constellations: fall, 240; figures, 315; Hercules, 56; orientations, 376; summer, 116, 176

Double stars: mass-luminosity relation, 17; statistics of binaries, 266

Earth: cloud satellites, 356; transit seen from Mars, 338; upper-air density, 335

Eclipses: July 31st solar, 123, 251; July 20, 1963, solar, 331

Education: careers in astronomy, 126, 197; conference, 251; Maryland, 15; UCLA, 81

Galaxies: M33, 286; NGC 604, 286; NGC 821, 354; NGC 891, 354; NGC 908, 354; NGC 949, 354; NGC 1023, 354; NGC 4564, supernova, 357; NGC 7479, 221; NGC 7619, 221; NGC 7626, 221; NGC 7678, 221

History: Galileo, 137; Jupiter's satellites, 137; McDonald Observatory, 316; A. G. Pingré, 321; Pulkovo Observatory, 12; T. J. J. See, 193

Intergalactic hydrogen: 267

Jupiter: 70, 250, 351; aurora? 16; Galilean satellites, 137; Red Spot, 93, 218; rotation, 196; System III, 132

Magellanic Clouds: super-supergiants in, 16

Mars: 249 (correction, 343)

Mercury: 249; atmosphere, 266

Meteorites: Antarctic micrometeorites, 335; Argentine, 132

Meteors: Eta Aquarids, 36; fireballs — April 23rd, 19; May 20th, 36; Giacobinids, 325; Leonids, 306; observing, 285; Perseids, 220, 284; strange, 327

Milky Way: age, 16; X-rays from, 196

Moon: crater models, 195, 315; Flamsteed, 36; geologic maps, 196; spotlighted, 15; Wallace, 218

Nebulae: filamentary, 191; NGC 6726-7, 69; North America, 31, 353; planetary — Dumbbell, 95; Ring in Lyra, 95; S147, 191

Novae: 308

Observatories: Colorado astrophysics laboratory, 251; Green Bank, 21; Hamburg, 198; Hat Creek, 64; Leuschner, 130; McDonald, 316; Parkes, N.S.W., 184; Pulkovo, 12; St. Procopius, 342; Vermilion River, 322

Observatories, amateur: 210; heated, 370

Observing: binoculars, 207; demonstration objects, 352; meteors, 285; NGC numbers, 273; photoelectric manual, 221

Occultations: observing, 282; Saturn, June 21st, 92; September 11th, 174, 268; Venus, 154

Optics: caustic-curve tester, 106; coronagraph, 197, 315; making eyepieces, 300, 303

Personal notes: W. W. Coblentz, 260; E. Pettit, 74; G. Reber, 132; S. K. Roy, 16; T. J. J. See, 193; J. Schilt, 74; J. van der Bilt, 335

Photography: astrometry, 198; lunar and planetary, 30; with portable telescope, 150

Planetariums: Edmonton, Canada, 86; Los Angeles, Calif., 74; Napier, New Zealand, 132; Orlando, Fla., 326; Washington, D.C., 20

Planets: Liège colloquium, 248 (correction, 343)

Practical astronomy: 66, 123

Professional astronomers: AAS headquarters, 16; meetings — AAS, 74, 335

Radio astronomy: sun, 139; 210-foot telescope results, 254

Radio telescopes: Green Bank, 21; Hat Creek, 64; Illinois, 322; simple, 75; Stanford, 83; Sugar Grove, 132; 210-foot Australian, 184

Rainfall: 251

Saturn: 215, 250; occultation of star, 54, 154

Seattle World's Fair: 208

Site testing: in New Zealand, 4

Space science journal: 196

Stars: binary, 266; catalogues, 196; evolution, 267; positions, 198

Sun: atmospheric motions, 141; corpuscular emission, 133; distance, 63; early evolution, 328; flares, 22, 31, 133; flying coronagraph, 77; interference filters, 51; international year, 15; prominences, 22; radio emission, 139

Supernovae: in NGC 4564, 357

Telescopes: automatic guiding, 88; cross-axis mounting, 48; diagonal placement, 368; 84-inch for Argentina, 327; fork flexure, 335; 40-inch Cagigal, 9; inexpensive mounting, 109; making, at boys' club, 10; making eyepieces, 300, 303; McMath, 11, 335; portable, for photography, 170; rich-field, 168; spherical reflector, 231

Variable stars: Algol, 374; finding date of maximum, 219; low-luminosity, 67; HV 8002, 132; W Andromedae, 306; R Arietis, 238; RW Aurigae, 68; R Bootis, 219; R Camelopardalis, 374; S Cephei, 174; BO Cephei, 68; Mu Cephei, 114; UV Ceti, 68; T Chamaeleontis, 68; R Coronae Borealis, 94; R Draconis, 54; T Orionis, 68; T Tauri, 68; RR Tauri, 68

Venus: 249
